Everyday Mathematics Kentucky Classroom Resource Package Grade 6

Everyday Mathematics is the nations leading Standards Based Mathematics program. Based on the research of the authors at the Univ Of Chicago School Mathematics Project the curriculum, was partially funded through grants of private industry leaders like GTE and Amoco, as well as the NSF. The program was written one grade level at a time beginning in Kindergarten in 1986 then extensively field tested and rewritten before finally all grades through sixth were completed in 1996. With over twenty years of research and field testing beyond the program, Everyday Mathematics is now the program of choice for over 3.5 million students in the United States, Content and Instructional Plan Everyday Math was developed with the belief that children seldom learn a concept or skill the first time it is presented to them. Mathematics concepts are taught progressively throughout each grade level, as well as across grade levels. Everyday Mathematics is in alignment with the Mississippi state mathematics standards. Activities, lessons, and experiences vary between grade levels. A typical day's lesson for includes: • A three part lesson plan focusing on lesson objectives, provide ongoing practice for students, and addressing individual student needs for a variety of populations. • Getting started activities with the daily math message used as a lesson opener. Mental Math and Reflexes offers mental-mathematical opportunities. • Student Math Journals to facilitate Individual, Small Group, and Partner activities. • Math Boxes contain short problems to practice and refine understanding of mathematical concepts. • Games provide fact practice alternatives to worksheets and pencil and paper drills. • Home Links or Study Links for home study. • Cross Curricular, theme-based activities that can be woven throughout the year.
